

SIERROS BROS S.A.

Industrial Sewing Machines since 1974

The European Dealer Meeting 2008 of DÜRKOPP-ADLER

On the 8th-10th of April 2008, SIERROS BROS S.A. participated in The European Dealer Meeting 2008 of DÜRKOPP-ADLER which took place in Bielefeld, Germany, the city in which the plant of DÜRKOPP-ADLER is located. In this meeting, the annual results and the successful rise of the company during the last years were presented, while the targets for the future were defined. The big success of the meeting was determined by the evolution of Dürkopp-Adler in new machines of high technology.

Some of the new types of machines that were presented are:

- 1) Model 281 - the new lockstitch machine with lubrication only in the hook of 5000 rpm, with 4,5mm stitch, with easy to place and to remove direct drive motor in the upper shaft, and with easy configuration of the whole machine by the use of pins, like in previous models.
- 2) A series of machines for curtains.
- 3) Model 204-0121 – decorative post-bed machine for vehicles and furniture.
- 4) Model 868 - two needle postbed machine for decorative seams with thread cutter
- 5) Puller for all types of machines with step motor
- 6) Model 827 - two needle sewing machines for jeans
- 7) Model 910 - new series of pattern machines with big field
- 8) Model 327 - transport lockstitch for very thick threads for decorative seams
- 9) Model 175-176 - high speed chainstich machines with upper feed
